

The South African National Geography Olympiad (SANGO) - 2018

This is the 2018 year-end report for the South African National Geography Olympiad (SANGO).

The SSAG and the Southern African Geography Teachers' Association (SAGTA) ran the second online SANGO in September 2018.

In 2017 some 946 learners successfully participated, in 2018 this increased to 1143. Some of our milestones in 2018, include:

- A wider range of public schools participating in 2018 compared to 2017.
- A pleasing percentage of 2017 schools elected to participate again, meaning they felt we offered a quality product.
- Those who participated were particularly satisfied with the overall service, quality of the test, and the support and communication they had from the SANGO team.
- More learners in 2018 than in 2017.
- 8 of the 9 provinces participated (up from 7 in 2017).
- We will hold the competition on **21 May 2019**.
- ALL Grade 10s, 11s and 12s can enter.
- We look forward to many more schools and many more pupils participating in SANGO 2019!
